# Litcham High School

## Dance Studio

**Completed January 2011**

The project consists of construction of a new dance studio for the school, purpose built to Sport England standards and the relocation of an existing mobile classroom. The scheme provides both facilities for the school and outside user groups.

The dance studio is a Glulam timber frame structure with insulated SIP panel walls and roof. The choice of materials allowed faster construction time as well as high levels of insulation.

The building has set a new standard for sustainability at the school.
